How it works

How we make money from your investment

We strive to be very transparent in our dealings with investors and so we are obligated to tell you how we make profits for you with your money in simple terms as we can. Our investment plans have a Minimum of 4.8% Return On Investment(ROI) , in clear Figures we should calculate that an investment of \$100 will return profits of over 19.2% in 4 days which is the minimum trading duration for our short term investment, except the investment plan is upgraded, your deposit stays intact and can be withdrawn along side your profits or can be reinvested, This Is one of the safest investment with zero risks as this platform provides a level of assets And capital protection, once your assets is invested on, your initial capital cannot and will not be affected by market Volatility even though the value of Assets Invested on increases or decreases during trading it doesn't affect your initial capital negatively, You also get to reap additional rewards when the value of the Assets we will be Trading on goes through an upsurge in the trade market. This is different not just having to buy and hold cryptocurrencies in your wallet, like most ignorant people do waiting for it to rise while there is an upsurge and trying to sell it off before it dips
